

We Present You Four Modules In This Project:

- ✓ Super Admin Module.
- ✓ Admin Module for client.
- ✓ Supervisor Panel
- ✓ Tab Applications for end users (android and IOS)

Super Admin:

- Super admin will have all the data related to the clients. In this dashboard admin will have analytics, reports, client's registrations, Add, View Client's, and Advertisements.

Admin Module:

- Client admin will have the data related to his company. The client dashboard will have analytics, reports, supervisors registrations, Add, view supervisors, Add floors, Advertisement.

Supervisor Panel:

- Supervisor admin will have data related to his floors assigned by the client Admin. Supervisors will have reports.

Tab Application:

- Tab application will have registration and login fields provided by the client.
- Tab will have feedback panel with options (Good, Average and poor).
- When a user clicks on good a pop will appear with message "Thank you for submitting your feedback."
- When a user clicks on average and poor a popup will appear with the options by projecting the problem with info graphic images. When a user clicks on any issue the screen will display "message "Thank you for submitting your feedback."

Note: All the reports table will have search options to get the refined data according the requirement.
